

BCA Toxicology Blood Testing Capabilities

All samples screened by EIA (enzyme-linked immunoassay). Confirmation analyses completed on GC-MS or LC-MS/MS.

Bold = drug category as listed on screening results

Indented = drugs included in category

Drugs included in preliminary blood screen:

Confirm:

Cannabinoids

Yes

- Delta-9-tetrahydrocannabinol (delta-9-THC)
- 11-hydroxy-delta-9-tetrahydrocannabinol (psychoactive metabolite)
- 11-nor-hydroxy-delta-9-tetrahydrocannabinol (nonpsychoactive metabolite)
- Delta-8-tetrahydrocannabinol (delta-8-THC)
- Cannabidiol (CBD)
- Cannabinol (CBN)
- Cannabigerol (CBG)

Cocaine metabolite

Yes

- Cocaine
- Cocaethylene (metabolite)
- Benzoylcegonine (metabolite)

Opiates

Yes

- Hydrocodone
- Codeine
- Oxycodone
- Hydromorphone
- 6-acetylmorphine (6-MAM)(metabolite of heroin)
- Morphine
- Oxymorphone

Amphetamines

Yes

- Amphetamine
- Phentermine
- Phenylpropanolamine (PPA)/Cathine*
- Methamphetamine
- Cathinone (by request)*
- Ephedrine
- Pseudoephedrine*
- Methylenedioxyamphetamine (MDA)
- Methylenedioxymethamphetamine (MDMA)

Phencyclidine (PCP)

Yes

Barbiturates

Yes

- Amobarbital
- Butalbital
- Pentobarbital
- Phenobarbital
- Secobarbital

Fentanyl

Yes

- Fentanyl*
- Norfentanyl (metabolite of fentanyl)*
- Acetyl fentanyl (by request)*
- Acetyl norfentanyl (metabolite of acetyl fentanyl) (by request)*
- Furanyl fentanyl (by request)*
- Furanyl norfentanyl (metabolite of furanyl fentanyl) (by request)*

*Confirmation reported qualitatively, no numerical value will be attached.

BCA Toxicology Blood Testing Capabilities

All samples screened by EIA (enzyme-linked immunoassay). Confirmation analyses completed on GC-MS or LC-MS/MS.

Bold = drug category as listed on screening results
Indented = drugs included in category

Drugs included in preliminary blood screen (continued):

Confirm:

Benzodiazepines

Yes

Diazepam
Nordiazepam
Oxazepam
Temazepam
Lorazepam
Clonazepam
7-amino-clonazepam (metabolite of clonazepam)
Alprazolam
 α -hydroxy-alprazolam (metabolite of alprazolam)
Triazolam
 α -hydroxy-triazolam (metabolite of triazolam)
7-amino-flunitrazepam (metabolite of flunitrazepam "rohypnol")
Desalkylflurazepam (metabolite of flurazepam)
 α -hydroxy-midazolam (metabolite of midazolam)
Midazolam

NPS Benzodiazepines

Bromazolam*
Clobazam*
Clonazolam*
Delorazepam*
Deschloroetizolam*
Diclazepam*
Etizolam*
 α -Hydroxyetizolam*
Flualprazolam*
Flubromazepam*
Flubromazolam*
Flunitrazolam*
Meclonazepam*
Nifoxipam*
3-Hydroxyphenazepam*
Pyrazolam*

Methadone

Yes

Zolpidem

Yes

*Confirmation reported qualitatively, no numerical value will be attached.

BCA Toxicology Blood Testing Capabilities

Confirmation tests available upon request (not included in screen):

Trazodone*

Buprenorphine

Buprenorphine*

Norbuprenorphine (metabolite)*

Ketamine

Ketamine

Norketamine (metabolite)

Diphenhydramine

Stimulants (commonly known as bath salts)

Fluoromethcathinone (flephedrone)*

Methylmethcathinone (mephedrone)*

N-benzylpiperazine (BZP)*

3,4-methylenedioxy-N-methylcathinone (methylo)*

α -pyrrolidinopentiphenone (α -PVP)*

Methylenedioxypropylone (MDPV)*

Tramadol

Tramadol*

N-desmethyl-cis-tramadol (metabolite)*

O-desmethyl-cis-tramadol (metabolite)*

Cyclobenzaprine*

Methylphenidate*

Dextromethorphan*

Cathinone*

GHB (gamma-hydroxybutyric acid)*

Phenytoin

Carisoprodol

Carisoprodol*

Meprobamate*

*Confirmation reported qualitatively, no numerical value will be attached.
